**Name** AWA MEDIUM D H

**Type** pendent lamp

**ID** PC1129

**Description** A ball made from air wrapped in liquid is called "awa" in Japanese. This design sprung from the idea of creating lighting that looks like soft glass which has retained its shape after being inflated. I hope it gives the impression of seeing a ball of air floating when you look up. Another characteristic of this design is that its wood and metal parts look made of glass, as if they were stoppers (corks) for the air.
